RICHARD E. BLUBAUGH
Vice President – Environmental
Health & Safety Resources

October 7, 2008

Department of Environment
And Natural Resources
PMB 20220
Joe Foss Building
523 East Capitol
Pierre, South Dakota 57501-3182

Attention: Eric Holm, Natural Resources Project Engineer
Minerals and Mining Program

Subject: Re: Request for additional information Dated October 6, 2008.

Powertech has reviewed the department's letter concerning request for additional information in order to deem the Request for Determination of Special, Exceptional, Critical, or Unique Lands that Powertech submitted on October 6, 2008. Powertech submits the following information to address the requests in order for the department to complete the Request:

1. Application Form: *Since there were no changes to the original application form submitted on August 21, 2008, Powertech did not need to submit another application form with the October 6 submittal. We replaced the original application form with the one from the October 6 submittal. In the future, please note that if there are no changes to the application form, additional forms do not need to be submitted.*

Noted; thank you for the information. This principle will be applied in future submittals

2. SDCL 45-6B-33.3 (1 and 2), Sections 4.1 and 4.2, page 8: *Powertech may want to include in these sections such items as impacts to threatened and endangered species, any effects on surface and ground water that may adversely affect wildlife and plants, and whether the surface area can be successfully reclaimed to rangeland.*

These issues have been discussed throughout this document in Section 3.0, 4.0, 5.0 and appendices. It is Powertech's understanding that this application does not require an impact analysis. A comprehensive and detailed impact analysis will be submitted to DENR within the Large Scale Mine Permit Application.

3. *ARSD 74:29:10:04: Please submit proof, such as certified mail receipts, that copies of the August 21, 2008 Request, the October 6 supplemental information, and the information requested in this letter have been sent to the various review agencies. I have previously enclosed a revised list of the review agencies that includes some contact and address changes.*

Please see enclosures for proof of the October 6, 2008 information has been mailed to the various review agencies.

4. *Section 2, Proposed Mining Area, Page 3: In comparing the sections listed that will be part of the proposed permit boundary with the sections listed in the various draft baseline reports, it appears that some of the sections included in the permit boundary were not included in the baseline reports. For example, the draft baseline vegetative report did not include Sections 20, 21, 27, and 31; T6S-R1E and Sections 4, 5, 14, and 15; T7S-R1E. In order to ensure that we adequately evaluate the proposed mining area for special, exceptional, critical, or unique characteristics, Powertech needs to complete baseline data gathering for vegetation, wildlife, cultural resources, and radiological sampling for **all** land within the permit boundary. Since baseline data gathering began in 2007, the following parcels were added to the permit area:*

- a. *Section 20 T6S R1E – W ½ SW ¼; SE ¼; and E ½ NE ¼;*
- b. *Section 21 T6S R1E – NW ¼; SW ¼; W ½ NE ¼; and NW ¼ SE ¼;*
- c. *Section 27 T6S R1E – S ½*
- d. *Section 28 T6S R1E – NE ¼ NW ¼;*
- e. *Section 30 T6S R1E – SW ¼*
- f. *Section 33 T6S R1E – SE ¼ SW ¼; and S ½ SE ¼;*
- g. *Section 34 T6S R1E – N ½ NW ¼; and NW ¼ NE ¼;*
- h. *Section 1 R7S R1E – N ½ NE ¼;*
- i. *Section 4 R7S R1E – W ½ NW ¼; and W ½ SW ¼;*
- j. *Section 5 T7S R1E – all*
- k. *Section 12 T7S R1E – S ½ SE ¼; and*
- l. *Section 14 T7S R1E – SW ¼ NE ¼; and SE ¼ NW ¼*

Powertech will need to submit the baseline data, or a summary of the data, for these parcels to help the department make its determination.

Powertech has provided the baseline information that statistically represents and characterizes the proposed permit area with respect to resources within the boundary and surrounding area; letters from reputable and qualified scientists have been furnished to the department regarding the wildlife and cultural surveys performed. The revisions of the permit boundary during the baseline studies did not impact the qualitative or quantitative data captured for this project. The studies all represent and characterize the proposed permit area with statistical significance appropriate for the size and level of ecological variation that exists within the study area. Powertech has addressed all areas that may be potential “mining areas”. Only 10 to 15% of the proposed permit area is typically

affected from in-situ operations. An in-depth discussion will be presented for each relevant media and discipline within the Large Scale Mine Permit Application.

5. Section 4.7.2, Surface Soils, Page 11: Please provide data that supports Powertech's claim that Radium-226 concentrations in soils collected at the site are similar to those obtained regionally and nationally.

Enclosed is *Table 2.9-5, Radionuclide Concentrations in All Soil Samples*, that also will be included in the Large Scale Mine Permit Application. The table shows the Radium-226 concentration results from the soil samples collected from the project area. "The geometric mean and geometric standard deviation of Ra-226 concentrations in surface soils (0-15 cm) for the proposed Dewey-Burdock uranium in-situ recovery project is 1.4 pCi/g (1.4×10^{-6} μ Ci/g) and 2.1 pCi/g (2.1×10^{-6} μ Ci/g) respectively. These concentrations are comparable to the regional (Wyoming) and national Ra-226 concentrations in surface soils reported in Table 1 by T.E. Myrick et al." Please append Table 2.9-5 to the application as Appendix E.

6. Appendix C – Letter from BKS Environmental Associates, Inc. on Vegetation: Please include the list of potential sensitive species and/or species of local concern from Dave Ode in the appendix.

Please see enclosures for the table from Dave Ode for inclusion into Appendix C.

Please let us know if Powertech is planning on adding any additional areas to the proposed mine permit boundary. It would be best if all possible mining areas are addressed in this Request for Determination of Special, Exceptional, Critical, or Unique Lands. If, after the department makes its determination Powertech adds other areas to the permit boundary, a separate Request for Determination would need to be submitted for the additional lands. This would cause additional delays in Powertech obtaining a large scale mine permit.

Powertech has no plans at this time to include additional lands within the proposed permit area.

If you have any questions, please feel free to contact me.

Respectfully,

Richard E. Blubaugh
Vice President – Environmental
Health & Safety

Enclosures

cc: Mark Hollenbeck
